

OcularIP

Optimize everything.

INTRODUCING NEW FEATURES

NEW Optimize AT&T Report (OAR) Program

Find additional savings and increase profit

- Reduce the SLA credits to AT&T
- Save on: gross margins, free cash flow
- Reflect your true service delivery performance to AT&T

NEW Wireless Report Optimization

Pay less service credits

- The Wireless Report now provides an automated approach to optimize your services
- Easily include Boosted Optimization Analytics
- Based upon analytics of service, a bulk event ticket file will be created for carrier use
- These “tickets” can be automatically entered into OcularIP for your service optimization

NEW Downtime Report for Impact Analysis

More efficient impact analysis

- Improve your business and reporting workflow with efficient impact analysis capabilities
- Single source report allows you to easily identify exclusion periods for exclusion events
- Validate customer reported outage duration
- Quickly find outages to analyze internally
- Easily see periods of downtime
