

Non-vulnerable: Secure to financial standards & then some.

The world's largest financial content provider trusts OcularIP. We meet the security requirements for all major carriers and enterprise commercial customers, including financial institutions, governments, and healthcare providers.

We also maintain a security program designed to ensure the security and integrity of data, protect against security threats or data breaches, and prevent unauthorized access to the data and environments of our customers.

- External compliance audits (SOC 1 and SOC 2 Reports)
- Physical Security
- Data Segregation
- Data Backups
- Unified Security Model
- Logical Security
- Single sign-on support
- Authorization
- System-to-system access
- Beyond logic, encryption, firewalls and IDS/IPS security
- 3-Tier security abstraction architecture
- Privately hosted computing platform
- Stringent Corporate Policies

OcularIP maintains a security program designed to ensure the security and integrity of data, protecting against security threats or data breaches and preventing unauthorized access to the data and environments of our customers.
